

# Prabhjot Gill

Union city, CA | 510-365-8427 | [gillprabhjot2007@gmail.com](mailto:gillprabhjot2007@gmail.com) | [LinkedIn](#)

## EDUCATION

---

Bachelor of Science, Computer Science

June 2026

University of California, Santa Cruz

**Relevant Coursework:** Introduction to Computer Programming, Programming W/ Data Structures, Assembly Language Program, Discrete Structures, Programming Abstraction: Python, Data Structures & Algorithms, Computer Architecture, Machine Learning Basics: Data Analysis and Empirical Methods, Artificial Intelligence

**Certification:** [Programming Foundations with Python](#), [Python, Mastering Control Structures in Python](#), [Introduction to Simple Data Structures in Python](#), [Introduction to Programming with Python](#), [Exploring Iterations and Loops in Python](#).

**Core Skills:** AI Fundamentals, Software Engineering Principles

## EXPERIENCE

---

**UL Solutions**

May 2024 - August 2024

SAR Engineer Intern

Fremont, CA

- Leveraged expertise in CSM500 and CDasy6/8 to maintain software updates and ensure operational accuracy, applying software engineering principles to enhance testing reliability for high-security clients.
- Collected and analyzed thousands of data points using Microsoft Excel, applying principles of artificial intelligence to identify trends and insights.
- Conducted tailored test operations for WCDMA, GSM, LTE, and FR1, ensuring precise evaluation and documentation.
- Applied 5S principles to streamline processes, completed six projects for a high-security client within deadlines, and communicated results effectively to engineering teams under strict confidentiality agreements.

**Mcdonald's**

April 2021 - April 2024

Team Member

Union City, CA

- Provided exceptional service to hundreds of customers daily in a fast-paced environment, demonstrating strong communication skills and ensuring workplace safety and cleanliness.
- Coached and onboarded new team members to uphold company standards, improving operational efficiency over three years.

## PROJECTS

---

**Average Coder**

May 2023

- Analyzed real-world AQI and cost datasets to rank 15 optional routes via Google Maps API, catering to health-conscious individuals.
- Leveraged advanced C++ data structures to integrate APIs and toll data, demonstrating strong analytical skills and proficiency in data handling.

**Mediocre Coders**

December 2023

- Implemented a MIPS assembly program with a bitmap display to raise awareness about endangered land animals, focusing on rhinos.
- Improved input handling and user interactivity in a MIPS assembly bitmap display, collaborating closely with teammates to enhance communications and problem-solving.
