EDUCATION

Bachelor of Science, Computer Science

June 2026

University of California, Santa Cruz

Relevant Coursework: Data Structures & Algorithms, Computer Architecture, Discrete Structures, Machine Learning Basics, Artificial Intelligence, Assembly Language Programming

SKILLS

Languages: Python, C++, C

Tools & Platforms: Git/GitHub, VS Code, Linux, Microsoft Excel, Azure

EXPERIENCE

UL Solutions

May 2024 - August 2024

SAR Engineer Intern

Fremont, CA

- Ran product safety compliance tests pre-market launch using CSM500 and CDasy6/8 equipment, executing a Python script to automate test runs across 4 protocols (CDMA, GSM, LTE, FR1), then exported and analyzed results in Microsoft Excel to verify safety thresholds before market release.
- Completed 6 full testing projects for a high-security client within strict deadlines, maintaining accuracy and confidentiality while communicating results to engineering teams to support.

Mcdonald's

April 2021 - April 2024

Shift Manager

Union City, CA

- Managed daily store operations and staff of 20 employees in the general manager's absence, overseeing workflow, customer service, and issue resolution during peak business hours.
- Trained and onboarded 10+ new team members on company standards and procedures, improving team readiness and operational efficiency over a 3-year period.

PROJECTS

Health Route Ranker

May 2024

- Collaborated with a team to build a C++ tool that ranks 15 route options using real-world AQI and cost datasets, integrating the Google Maps API for health-conscious route planning.
- Applied C++ data structures to process and merge API and toll-cost data, enabling accurate multi-factor route ranking.

Rhino Awareness Game

June 2024

- Collaborated with a team to build a MIPS assembly program with a bitmap display, designed to raise awareness for endangered rhinos through interactive visuals.
- Implemented input handling to improve user interactivity with the bitmap display, coordinating with teammates on integration and testing.

LockIn: Focus & Productivity Extension 2026

January 2026

- Built a Chrome extension that blocks distracting websites for a customizable timer duration, helping students maintain focus during study sessions.
- Designed a gamified streak system with a virtual pet that grows with daily focus sessions, and integrated 5 focus music options to support concentration for users with anxiety or ADHD.
